PROFESSIONAL EXPERIENCE

Software Engineer / Application Technical Lead

PNC Bank | January 2021 – Present

- Lead development initiatives supporting enterprise-scale analytics and business applications used across multiple business units.
- Partner with business stakeholders to translate operational and reporting needs into scalable technical solutions.
- Design automated data pipelines and reporting processes that improve data accuracy and reduce manual effort.
- Lead cross-functional teams through project planning, implementation, testing, and production deployment.
- Mentor junior engineers while promoting collaboration, accountability, and continuous improvement.
- Developed data-driven applications supporting enterprise analytics and business intelligence.
- Improve deployment efficiency and operational reliability through automation and process optimization.
- Build comprehensive testing frameworks that ensure system accuracy, stability, and regulatory-quality standards.

Freelance Software Engineer

Independent Consulting | 2020 – Present

- Consult with clients to understand business objectives and develop customized software and analytics solutions.
- Manage projects from initial requirements through deployment and ongoing support.
- Analyze business processes to identify opportunities for automation, efficiency improvements, and data-driven decision making.
- Deliver scalable applications that improve operational performance and long-term maintainability.
- Build lasting client relationships through responsive communication and dependable project execution.
